Subject: Duwamish Stormwater Drainage and Outfall Information
discussed during October 15, 2002 Meeting

BOEING

Dear Mr. Albright:

This letter transmits information on stormwater outfalls discussed at our October 15, 2002 meeting and in Kirk Thomson's October 25, 2002 letter to John Iani.

The enclosed graphics are for the wider area but as such they include information specific to the past and present configuration of areas drained by the outfall between the Isaacson and Thompson properties (Early Action Site #8) and the outfall between the Jorgensen and Plant 2 properties.

These maps were generated either by Boeing or by King County. For our purpose here we did not solicit information from other property owners in the area, and so we suggest EPA assumes that additional information may be available from other parties, including from King County.

Please don't hesitate to contact me with any questions or comments.

Sincerely,

Steven Tochko
Manager, Boeing Environmental Remediation
Support Services Group
